E. RATIONALE FOR FINAL STRATEGY DETERMINATION The Gimble Salvage Co is a 1-acre, active scrap yard which buys and sells non-ferrous scrap. Analysis of soil samples taken during a PCB inspection on 12/30/83 revealed elevated levels of PCB's (1260 ppm). As a result of these findings, an administrative civil complaint was issued to this company for the following violations of TSCA: (1) failure to mark PCB capacitors (2) improper storage of PCB capacitors and (3) uncontrolled discharge of PCB contaminated oil. Consequently, Mr. Gimble contracted Rollins Environmental Services to remove, transport, and incinerate the contaminated soil. Samples taken following the removal show that the PCB concentration was effectively reduced to 1 ppm. Gimble Salvage also paid \$2000 in civil penalties to the EPA. Because the endangerment to human health and the environment has been eliminated, no further investigative action is necessary.
